

COMMUNITY ANNOUNCEMENTS

Feel More Connected To Your Community

Walking and wheeling, also known as active transportation, to school can benefit the entire community! Streets can be made safer and easier to walk and bike on with improvements such as bike lanes and sidewalks. Try to find areas that help make walking and biking safer for YOU in your neighbourhood and areas that could be safer on your travel home tonight! Get walking and wheeling!

Walking and wheeling to school does more than improve your health – it benefits the whole community! The more people that are out walking, means there are more people outside and on the streets, meeting and talking. Did you know smiling is contagious? Walking and wheeling to school will put a smile on your face and others! Get walking and wheeling!

More people walking or wheeling to school gets more “eyes on the street” making everyone safer. Students and people in the community can look out for each other, making the community a safer place to live and travel. Tell your classmates how safe you feel on your walk or wheel to school to get everyone out walking and wheeling!

Do you like to walk or wheel to school? Do you like to hang out with friends? Do you know if your school has Walk & Wheel Wednesdays or a Walking School Bus? You can walk or wheel with friends and meet new ones on the walk to school! Start your own walking group by talking to your friends that could walk to school together!
